SUMMARY

Full Stack Developer with 4+ years of experience building scalable SaaS products, headless CMS platforms, business dashboards, and cross-platform mobile apps for startups, agencies, and enterprises across the US, UK, Canada, Australia, and Europe. Business-outcome driven: engineers backwards from revenue, time saved, and user retention. Treats performance, SEO, and accessibility as requirements, not extras.

EXPERIENCE

Freelance Full Stack Developer | Independent, Worldwide | 2022 – Present

- Delivered 200+ projects for startups, agencies, and enterprise clients across five continents.
- Owned end-to-end delivery: architecture, design systems, development, deployment, and long-term support.
- Built multi-tenant SaaS products with authentication, billing, and role-based dashboards, from MVP to systems serving tens of thousands of daily users.
- Designed and shipped headless CMS platforms with Payload, Sanity, and Strapi, with content models tailored to client editorial workflows.
- Developed cross-platform iOS and Android apps with React Native and Expo, including over-the-air updates.
- Built versioned REST and GraphQL APIs with type-safe contracts, and integrated LLM-powered features such as search and content generation.
- Improved Core Web Vitals and SEO, targeting 95+ Lighthouse scores on delivered projects.

SELECTED PROJECTS

- **NexCommercePro** – Full-stack e-commerce platform with storefront, admin workflows, and scalable data layer. *Next.js, TypeScript, Prisma, PostgreSQL, Shadcn/UI*
- **Cryptoin1** – Web3 token presale platform with wallet connect, tokenomics, and live metrics. *React, Next.js, TypeScript, Shadcn/UI*
